# **Technical Data Sheet**

#### InVivoMAb anti-human CD4

<u>Attention</u>: Use of this product constitutes an agreement to Bio X Cell's Terms and Conditions which are included with this product in print and can also be found at <a href="https://bioxcell.com/terms-and-conditions">https://bioxcell.com/terms-and-conditions</a>.

## Lot Specific Information

Lot Number: Lot Specific\*
Volume: Lot Specific\*

Concentration: Lot Specific\* (generally 4 to 11 mg/ml) \*

Total Protein: Lot Specific\*

\*This information will be noted on the certificate of analysis that ships with this product.

## **Product Information**

Catalog Number: BE0003-2 Clone: OKT-4

**Isotype:** Mouse IgG2b, κ

Recommended Isotype Control(s): InVivoMAb mouse IgG2b isotype control, unknown specificity

**Recommended Dilution Buffer:** InVivoPure pH 7.0 Dilution Buffer

**Immunogen:** Human peripheral T cells

**Reported Applications:** *in vitro* T cell stimulation/activation

in vivo CD4+ T cell depletion in humanized mice

Flow cytometry Immunoprecipitation

**Formulation:** PBS, pH 7.0

Contains no stabilizers or preservatives

**Endotoxin:** <2EU/mg (<0.002EU/µg)

Determined by LAL gel clotting assay

**Purity:** >95%

Determined by SDS-PAGE

Sterility: 0.2 µm filtered

**Production:** Purified from cell culture supernatant in an animal-free facility

Purification: Protein G

RRID: AB\_1107638

Molecular Weight: 150 kDa

### **Description**

The OKT-4 monoclonal antibody reacts with the human CD4. The CD4 antigen is a 55 kDa cell surface type I membrane glycoprotein belonging to the immunoglobulin superfamily. CD4 acts as a co-receptor which in cooperation with the T cell receptor (TCR) interacts with class II MHC molecules displayed by antigen presenting cells (APC). CD4 is expressed by the majority of thymocytes, most helper T cells, a subset of NK-T cells and weakly by dendritic cells and macrophages. CD4 plays an important role in the development of T cells and is required for mature T cells to function optimally.

### **Storage**

Store at the stock concentration at 4°C. Do not freeze.

It is not uncommon for a floccule or precipitate to appear during storage. The floccule is typically buffer salts precipitating out of solution or a small bit of protein aggregation. For information on how to remove floccules or precipitates see our FAQ's at <a href="https://bioxcell.com/fags">https://bioxcell.com/fags</a>.

#### **Protocol Information**

Bio X Cell, LLC Page 1 of 2

Since applications vary, each investigator should use the application references as a guide to help estimate the appropriate dose or concentration. The dose or concentration can be further optimized experimentally in a dose response or titration experiment.
