# **Technical Data Sheet**

## InVivoMAb rat IgG2a isotype control, anti-trinitrophenol

<u>Attention</u>: Use of this product constitutes an agreement to Bio X Cell's Terms and Conditions which are included with this product in print and can also be found at <u>https://bioxcell.com/terms-and-conditions</u>.

### Lot Specific Information

| Lot Number:  | Lot Specific*                             |  |
|--|---|--|
| Volume:  | Lot Specific*                             |  |
| Concentration:   | Lot Specific* (generally 4 to 11 mg/ml) * |  |
| Total Protein:   | Lot Specific*                             |  |
| *This information will be noted on the certificate of analysis that ships with this product. |   |  |

### **Product Information**

| Catalog Number:                     | BE0089  |
|-------------------------------------|---|
| Clone:                              | 2A3   |
| Isotype:                            | Rat lgG2a, κ  |
| <b>Recommended Dilution Buffer:</b> | InVivoPure pH 6.5 Dilution Buffer                                 |
| Formulation:                        | PBS, pH 6.5<br>Contains no stabilizers or preservatives           |
| Endotoxin:                          | <2EU/mg (<0.002EU/µg)<br>Determined by LAL gel clotting assay     |
| Purity:                             | >95%<br>Determined by SDS-PAGE                                    |
| Sterility:                          | 0.2 µm filtration   |
| Production:                         | Purified from cell culture supernatant in an animal-free facility |
| Purification:                       | Protein G   |
| RRID:                               | <u>AB_1107769</u>   |
| Molecular Weight:                   | 150 kDa   |

### Description

The 2A3 monoclonal antibody reacts with trinitrophenol. Because trinitrophenol is not expressed by mammals this antibody is ideal for use as an isotype-matched control for rat IgG2a antibodies in most in vivo and in vitro applications.

### Storage

Store at the stock concentration at 4°C. Do not freeze.

It is not uncommon for a floccule or precipitate to appear during storage. The floccule is typically buffer salts precipitating out of solution or a small bit of protein aggregation. For information on how to remove floccules or precipitates see our FAQ's at <a href="https://bioxcell.com/faqs">https://bioxcell.com/faqs</a>.

### **Protocol Information**

Since applications vary, each investigator should use the application references as a guide to help estimate the appropriate dose or concentration. The dose or concentration can be further optimized experimentally in a dose response or titration experiment.
