

# Technical Data Sheet

## InVivoMAb anti-mouse Jagged 2

**Attention:** Use of this product constitutes an agreement to Bio X Cell's Terms and Conditions which are included with this product in print and can also be found at <https://bioxcell.com/terms-and-conditions>.

### Lot Specific Information

**Lot Number:** Lot Specific\*  
**Volume:** Lot Specific\*  
**Concentration:** Lot Specific\* (generally 4 to 11 mg/ml) \*  
**Total Protein:** Lot Specific\*

\*This information will be noted on the certificate of analysis that ships with this product.

### Product Information

**Catalog Number:** BE0125  
**Clone:** HMJ2-1  
**Isotype:** Armenian hamster IgG  
**Recommended Isotype Control(s):** InVivoMAb polyclonal Armenian hamster IgG  
**Recommended Dilution Buffer:** InVivoPure pH 7.0 Dilution Buffer  
**Immunogen:** CHO cells expressing mouse Jagged-2  
**Reported Applications:** *in vivo* Jagged 2 neutralization  
**Formulation:** PBS, pH 7.0  
Contains no stabilizers or preservatives  
**Endotoxin:** <2EU/mg (<0.002EU/μg)  
Determined by LAL gel clotting assay  
**Purity:** >95%  
Determined by SDS-PAGE  
**Sterility:** 0.2 μm filtered  
**Production:** Purified from cell culture supernatant in an animal-free facility  
**Purification:** Protein A  
**RRID:** [AB\\_10949305](https://abnova.com/AB_10949305)  
**Molecular Weight:** 150 kDa

### Description

The HMJ2-1 monoclonal antibody reacts with mouse Jagged 2 one of many Notch ligands. Jagged 2 is expressed by thymic lymphoid and stromal cells, as well as macrophages and dendritic cells in the spleen. The Notch pathway is an important intercellular signaling pathway that plays a major role in controlling cell fate. The HMJ2-1 antibody has been shown to neutralize Jagged 2 *in vivo*.

### Storage

Store at the stock concentration at 4°C. **Do not freeze.**

It is not uncommon for a floccule or precipitate to appear during storage. The floccule is typically buffer salts precipitating out of solution or a small bit of protein aggregation. For information on how to remove floccules or precipitates see our FAQ's at <https://bioxcell.com/faqs>.

### Protocol Information

Since applications vary, each investigator should use the application references as a guide to help estimate the appropriate dose or concentration. The dose or concentration can be further optimized experimentally in a dose response or titration experiment.
