

# Technical Data Sheet

## InVivoMAb anti-mouse Pan-endothelial Cell Antigen (MECA-32)

**Attention:** Use of this product constitutes an agreement to Bio X Cell's Terms and Conditions which are included with this product in print and can also be found at <https://bioxcell.com/terms-and-conditions>.

### Lot Specific Information

**Lot Number:** Lot Specific\*  
**Volume:** Lot Specific\*  
**Concentration:** Lot Specific\* (generally 4 to 11 mg/ml) \*  
**Total Protein:** Lot Specific\*

\*This information will be noted on the certificate of analysis that ships with this product.

### Product Information

**Catalog Number:** BE0200  
**Clone:** MECA-32  
**Isotype:** Rat IgG2a,  $\kappa$   
**Recommended Isotype Control(s):** InVivoMAb rat IgG2a isotype control, anti-trinitrophenol  
**Recommended Dilution Buffer:** InVivoPure pH 7.0 Dilution Buffer  
**Immunogen:** Mouse lymph node stromal cells  
**Reported Applications:** Immunohistochemistry (frozen)  
Flow cytometry  
Western blot  
Immunofluorescence  
**Formulation:** PBS, pH 7.0  
Contains no stabilizers or preservatives  
**Endotoxin:** <2EU/mg (<0.002EU/ $\mu$ g)  
Determined by LAL gel clotting assay  
**Purity:** >95%  
Determined by SDS-PAGE  
**Sterility:** 0.2  $\mu$ m filtered  
**Production:** Purified from cell culture supernatant in an animal-free facility  
**Purification:** Protein G  
**RRID:** [AB\\_10950167](https://abnova.com/AB_10950167)  
**Molecular Weight:** 150 kDa

### Description

The MECA-32 monoclonal antibody reacts with mouse pan-endothelial cell antigen also known as MECA-32 and PLVAP (plasmalemma vesicle-associated protein). MECA-32 is a 60 kDa transmembrane homodimer which is expressed on the surface of most endothelial cells. However, MECA-32 shows restricted distribution in the skeletal, cardiac and brain tissues of adult and embryonic mice. In embryonic mice, MECA-32 expression is developmentally regulated in the vessels associated with the blood brain barrier and persists only through day 16 of gestation.

### Storage

Store at the stock concentration at 4°C. **Do not freeze.**

It is not uncommon for a floccule or precipitate to appear during storage. The floccule is typically buffer salts precipitating out of solution or a small bit of protein aggregation. For information on how to remove floccules or precipitates see our FAQ's at <https://bioxcell.com/faqs>.

### Protocol Information

Since applications vary, each investigator should use the application references as a guide to help estimate the appropriate dose or concentration. The dose or concentration can be further optimized experimentally in a dose response or titration experiment.
