# **Technical Data Sheet**

InVivoMAb anti-mouse CD29

<u>Attention</u>: Use of this product constitutes an agreement to Bio X Cell's Terms and Conditions which are included with this product in print and can also be found at <u>https://bioxcell.com/terms-and-conditions</u>.

#### Lot Specific Information

| Lot Number:  | Lot Specific*                             |  |
|--|---|--|
| Volume:  | Lot Specific*                             |  |
| Concentration:   | Lot Specific* (generally 4 to 11 mg/ml) * |  |
| Total Protein:   | Lot Specific*                             |  |
| *This information will be noted on the certificate of analysis that ships with this product. |   |  |

#### **Product Information**

| Catalog Number:                 | BE0232  |
|---------------------------------|---|
| Clone:                          | KMI6  |
| Isotype:                        | Rat lgG2a, κ  |
| Recommended Isotype Control(s): | InVivoMAb rat IgG2a isotype control, anti-trinitrophenol                    |
| Recommended Dilution Buffer:    | InVivoPure pH 7.0 Dilution Buffer   |
| Immunogen:                      | C57BL/6 x DBA/2 mouse bone-marrow stromal cell clone BMS2                   |
| Reported Applications:          | <i>in vitro</i> CD29 neutralization<br>Immunofluorescence<br>Flow cytometry |
| Formulation:                    | PBS, pH 7.0<br>Contains no stabilizers or preservatives                     |
| Endotoxin:                      | <2EU/mg (<0.002EU/µg)<br>Determined by LAL gel clotting assay               |
| Purity:                         | >95%<br>Determined by SDS-PAGE  |
| Sterility:                      | 0.2 μm filtered   |
| Production:                     | Purified from cell culture supernatant in an animal-free facility           |
| Purification:                   | Protein G   |
| RRID:                           | <u>AB_2687714</u>   |
| Molecular Weight:               | 150 kDa   |

# Description

The KMI6 monoclonal antibody reacts with mouse CD29 also known as integrin  $\beta$ 1, a 120-130 kDa member of the  $\beta$  integrin family. CD29 is expressed by leukocytes, endothelial, smooth muscle and epithelial cells. CD29 non-covalently associates with integrin  $\alpha$ 1- $\alpha$ 6 to form the VLA-1 through VLA-6 complexes. These  $\alpha$   $\beta$  integrin heterodimers are involved in adhesion, trafficking, proliferation and differentiation and bind to cell surface and extracellular matrix proteins including VCAM-1 and MadCAM-1.

# Storage

Store at the stock concentration at 4°C. Do not freeze.

It is not uncommon for a floccule or precipitate to appear during storage. The floccule is typically buffer salts precipitating out of solution or a small bit of protein aggregation. For information on how to remove floccules or precipitates see our FAQ's at <a href="https://bioxcell.com/faqs">https://bioxcell.com/faqs</a>.

# **Protocol Information**

Since applications vary, each investigator should use the application references as a guide to help estimate the appropriate

dose or concentration. The dose or concentration can be further optimized experimentally in a dose response or titration experiment.
