Technical Data Sheet

InVivoMAb anti-mouse c-Kit (CD117)

Lot Specific Information

 Lot Number:
 Lot Specific*

 Volume:
 Lot Specific*

Concentration: Lot Specific* (generally 4 to 11 mg/ml) *

Total Protein: Lot Specific*

*This information will be noted on the certificate of analysis that ships with this product.

Product Information

Catalog Number:BE0293Clone:ACK2Isotype:Rat IgG2b

Recommended Isotype Control(s): InVivoMAb rat IgG2b isotype control, anti-keyhole limpet hemocyanin

Recommended Dilution Buffer: InVivoPure pH 7.0 Dilution Buffer

Immunogen: IL-3-dependent mast cells

in vivo mast cell depletion in vivo c-Kit⁺ cell depletion in vitro c-Kit neutralization

Reported Applications:

in vitro c-Kit neutralization
Immunoprecipitation
Flow cytometry

PBS, pH 7.0

Formulation: Contains no stabilizers or preservatives

Endotoxin: <2EU/mg (<0.002EU/µg)

Determined by LAL gel clotting assay

Purity:

Determined by SDS-PAGE

Sterility: 0.2 µM filtered

Production: Purified from tissue culture supernatant in an animal free facility

Purification: Protein G

RRID:

Molecular Weight:

Description

The ACK2 monoclonal antibody reacts with mouse c-Kit also known as CD117, Steel factor receptor, stem cell factor receptor, and mast cell growth factor. c-Kit is a 145 kDa transmembrane tyrosine kinase and an immunoglobulin superfamily member. c-Kit is expressed on hematopoietic progenitor cells, mast cells, and acute myeloid leukemia (AML) cells. The interaction of the c-Kit receptor and its ligand stem cell factor (SCF), promotes the proliferation and differentiation of hematopoietic progenitor cells. The ACK2 antibody has been reported to deplete c-Kit⁺ cells, including mast cells, when administered *in vivo* and neutralize c-Kit⁺ signaling when used *in vitro*. This antibody is reported to cross-react with rat c-Kit.

Shelf-life and Storage

Store at the stock concentration at $4\,^{\circ}\text{C}.$ Do not freeze.

Protocol Information

Since applications vary, each investigator should use the application references as a guide to help estimate the appropriate dose or concentration. The dose or concentration can be further optimized experimentally in a dose response or titration experiment.
