Technical Data Sheet

InVivoMAb anti-mouse/rat/bovine VLDL-R

<u>Attention</u>: Use of this product constitutes an agreement to Bio X Cell's Terms and Conditions which are included with this product in print and can also be found at https://bioxcell.com/terms-and-conditions.

Lot Specific Information

Lot Number: Lot Specific* Volume: Lot Specific*

Concentration: Lot Specific* (generally 4 to 11 mg/ml) *

Total Protein: Lot Specific*

*This information will be noted on the certificate of analysis that ships with this product.

Product Information

Catalog Number:BE0345Clone:IgG-6A6Isotype:Mouse IgG1, λ

Recommended Isotype Control(s): InVivoMAb mouse IgG1 isotype control, unknown specificity

Recommended Dilution Buffer: InVivoPure pH 7.0 Dilution Buffer

Immunogen: A peptide corresponding to the 10 C-terminal AA's (SVVSTDDDLA) of rat

VLDL-R coupled to KLH.

Reported Applications: Western blot **Formulation:** PBS, pH 7.0

Contains no stabilizers or preservatives

Endotoxin: <2ΕU/mg (<0.002ΕU/μg)

Determined by LAL gel clotting assay

Purity: >95%

Determined by SDS-PAGE

Sterility: 0.2 µm filtration

Production: Purified from cell culture supernatant in an animal-free facility

Purification: Protein G

RRID: AB_2894764

Molecular Weight: 150 kDa

Description

The IgG-6A6 monoclonal antibody reacts with the cytoplasmic tail of mouse, rat, and bovine very low-density lipoprotein receptor (VLDL-R). IgG-6A6 has also been reported to cross-react with human VLDL-R. VLDL-R is a member of the low-density lipoprotein (LDL) receptor family. The VLDL-R binds to triglyceride (TG)-rich lipoproteins but not LDL. VLDL-R is expressed in fatty acid-active tissues including heart, skeletal muscle, fat, and brain. Macrophages and dendritic cells also express VLDL-R. In contrast to the LDL receptor, VLDL-R binds apolipoprotein (apo) E2/2 VLDL particles as well as apoE3/3 VLDL. Various functions of the VLDL-R have been reported in lipoprotein metabolism, metabolic syndrome/atherosclerosis, cardiac fatty acid metabolism, neuronal migration, angiogenesis/tumor growth, and asthma.

Storage

Store at the stock concentration at 4°C. **Do not freeze.**

It is not uncommon for a floccule or precipitate to appear during storage. The floccule is typically buffer salts precipitating out of solution or a small bit of protein aggregation. For information on how to remove floccules or precipitates see our FAQ's at https://bioxcell.com/fags.

Protocol Information

Bio X Cell, LLC Page 1 of 2

Since applications vary, each investigator should use the application references as a guide to help estimate the appropriate dose or concentration. The dose or concentration can be further optimized experimentally in a dose response or titration experiment.
