Technical Data Sheet

InVivoMAb rat IgG2b isotype control, anti-trinitrophenol-keyhole limpet hemocyanin

<u>Attention</u>: Use of this product constitutes an agreement to Bio X Cell's Terms and Conditions which are included with this product in print and can also be found at https://bioxcell.com/terms-and-conditions.

Lot Specific Information

Lot Number: Lot Specific* Volume: Lot Specific*

Concentration: Lot Specific* (generally 4 to 11 mg/ml) *

Total Protein: Lot Specific*

*This information will be noted on the certificate of analysis that ships with this product.

Product Information

 Catalog Number:
 BE0425

 Clone:
 TNP-4G1

 Isotype:
 Rat IgG2b, κ

Recommended Dilution Buffer: InVivoPure pH 7.0 Dilution Buffer

Formulation: PBS, pH 7.0

Contains no stabilizers or preservatives

Endotoxin: <2EU/mg (<0.002EU/μg)

Determined by LAL gel clotting assay

Purity: >95%

Determined by SDS-PAGE

Sterility: 0.2 µm filtration

Production: Purified from cell culture supernatant in an animal-free facility

Purification: Protein G

RRID:

Molecular Weight: 150 kDa

Description

The TNP-4G1 monoclonal antibody reacts with trinitrophenol (TNP) hapten conjugated to keyhole limpet hemocyanin (KLH) protein. Because TNP-KLH is not expressed by mammals this antibody is ideal for use as an isotype-matched control for rat lgG2b antibodies in most in vivo and in vitro applications.

Storage

Store at the stock concentration at 4°C. **Do not freeze.**

It is not uncommon for a floccule or precipitate to appear during storage. The floccule is typically buffer salts precipitating out of solution or a small bit of protein aggregation. For information on how to remove floccules or precipitates see our FAQ's at https://bioxcell.com/fags.

Protocol Information

Since applications vary, each investigator should use the application references as a guide to help estimate the appropriate dose or concentration. The dose or concentration can be further optimized experimentally in a dose response or titration experiment.
