

# Technical Data Sheet

## InVivoMAb anti-mouse ACKR4 (CCR11)

**Attention:** Use of this product constitutes an agreement to Bio X Cell's Terms and Conditions which are included with this product in print and can also be found at <https://bioxcell.com/terms-and-conditions>.

### Lot Specific Information

**Lot Number:** Lot Specific\*  
**Volume:** Lot Specific\*  
**Concentration:** Lot Specific\* (generally 4 to 11 mg/ml) \*  
**Total Protein:** Lot Specific\*

\*This information will be noted on the certificate of analysis that ships with this product.

### Product Information

<b>Catalog Number:</b>	<b>BE0467</b>
<b>Clone:</b>	<b>A4Mab-3</b>
<b>Isotype:</b>	Rat IgG2b, $\kappa$
<b>Recommended Isotype Control(s):</b>	InVivoMAb rat IgG2b isotype control, anti-keyhole limpet hemocyanin
<b>Recommended Dilution Buffer:</b>	InVivoPure pH 7.0 Dilution Buffer
<b>Immunogen:</b>	A synthetic peptide corresponding to the N-terminal extracellular region of mACKR4 (amino acids 1-19)
<b>Reported Applications:</b>	Flow cytometry ELISA For details on <i>in vivo</i> applications, please contact <a href="mailto:technicalservice@bioxcell.com">technicalservice@bioxcell.com</a>
<b>Formulation:</b>	PBS, pH 7.0 Contains no stabilizers or preservatives
<b>Endotoxin:</b>	<2EU/mg (<0.002EU/ $\mu$ g) Determined by LAL gel clotting assay
<b>Purity:</b>	>95% Determined by SDS-PAGE
<b>Sterility:</b>	0.2 $\mu$ m filtered
<b>Production:</b>	Purified from cell culture supernatant in an animal-free facility
<b>Purification:</b>	Protein G
<b>RRID:</b>	
<b>Molecular Weight:</b>	150 kDa

### Description

The A4Mab-3 monoclonal antibody reacts with mouse atypical chemokine receptor 4 (ACKR4), also known as CCR11, CCRL1, CCX CKR, PPR1, and CCBP2. ACKR4 is expressed on T cells, stromal cells, and a subset of lymphatic endothelial cells within the skin, spleen, and gut. ACKR4 is a seven-transmembrane domain-containing protein that belongs to the atypical chemokine receptors (ACKRs) family. Due to their function, ACKRs are considered chemokine decoy receptors, internalizing receptors (interceptors), or chemokine-scavenging receptors. They mediate  $\beta$ -arrestin-dependent internalization of chemokines, followed by lysosomal degradation of the receptor-ligand complex. ACKR4 plays a key role in regulating cell migration by reducing the availability of inflammatory chemokines, specifically CCL19, CCL22, and CCL25, thereby limiting migratory responses mediated by CCR7, CCR6, CCR4, and CCR9. ACKR4 negatively regulates CXCR3-induced chemotaxis and facilitates the homing of CC7+ dendritic cells through scavenging and shaping CCL19 and CCL21 gradients in lymph nodes. ACKR4 is also involved in the regulation of thymic T-cell development and suppression of spontaneous autoimmunity. Loss of ACKR4 in colorectal cancer in mice is reported to impair DC migration to tumor-draining lymph nodes, which leads to a reduced number of tumor-specific T cells and resistance to immune checkpoint blockade therapy.

## Storage

Store at the stock concentration at 4°C . **Do not freeze.**

It is not uncommon for a floccule or precipitate to appear during storage. The floccule is typically buffer salts precipitating out of solution or a small bit of protein aggregation. For information on how to remove floccules or precipitates see our FAQ's at <https://bioxcell.com/faqs>.

## Protocol Information

Since applications vary, each investigator should use the application references as a guide to help estimate the appropriate dose or concentration. The dose or concentration can be further optimized experimentally in a dose response or titration experiment.
