Technical Data Sheet

InVivoPlus mouse IgG2c isotype control, anti-dengue virus

<u>Attention</u>: Use of this product constitutes an agreement to Bio X Cell's Terms and Conditions which are included with this product in print and can also be found at <u>https://bioxcell.com/terms-and-conditions</u>.

Lot Specific Information

Lot Number:	Lot Specific*	
Volume:	Lot Specific*	
Concentration:	Lot Specific* (generally 4 to 11 mg/ml) *	
Total Protein:	Lot Specific*	
*This information will be noted on the certificate of analysis that ships with this product.		

Product Information

Catalog Number:	BP0366
Clone:	DV5-1
Isotype:	Mouse lgG2c, κ
Recommended Dilution Buffer:	InVivoPure pH 7.0 Dilution Buffer
Formulation:	PBS, pH 7.0 Contains no stabilizers or preservatives
Endotoxin:	<1EU/mg (<0.001EU/µg) Determined by LAL gel clotting assay
Purity:	>95% Determined by SDS-PAGE
Sterility:	0.2 µm filtration
Production:	Purified from cell culture supernatant in an animal-free facility
Purification:	Protein A
RRID:	<u>AB_2894738</u>
Molecular Weight:	150 kDa

Murine Pathogen Test Results

Ectromelia/Mousepox Virus: Negative, Hantavirus: Negative, K Virus: Negative, Lactate Dehydrogenase-Elevating Virus: Negative, Lymphocytic Choriomeningitis virus: Negative, Mouse Adenovirus: Negative, Mouse Cytomegalovirus: Negative, Mouse Hepatitis Virus: Negative, Mouse Minute Virus: Negative, Mouse Norovirus: Negative, Mouse Parvovirus: Negative, Mouse Rotavirus: Negative, Mycoplasma Pulmonis: Negative, Pneumonia Virus of Mice: Negative, Polyoma Virus: Negative, Reovirus Screen: Negative, Sendai Virus: Negative, Theiler's Murine Encephalomyelitis: Negative

Description

The DV5-1 monoclonal antibody reacts with dengue virus. This antibody is ideal for use as an isotype-matched control for mouse IgG2c antibodies in in vivo and in vitro applications except for those involving dengue virus.

Storage

Store at the stock concentration at 4°C. Do not freeze.

It is not uncommon for a floccule or precipitate to appear during storage. The floccule is typically buffer salts precipitating out of solution or a small bit of protein aggregation. For information on how to remove floccules or precipitates see our FAQ's at https://bioxcell.com/faqs.

Protocol Information

Since applications vary, each investigator should use the application references as a guide to help estimate the appropriate dose or concentration. The dose or concentration can be further optimized experimentally in a dose response or titration experiment.
