Technical Data Sheet

FlowMAb APC anti-mouse NK1.1

<u>Attention</u>: Use of this product constitutes an agreement to Bio X Cell's Terms and Conditions which are included with this product in print and can also be found at https://bioxcell.com/terms-and-conditions.

Lot Specific Information

Lot Number: Lot Specific*
Volume: Lot Specific*

Concentration: Lot Specific* (generally 4 to 11 mg/ml) *

Total Protein: Lot Specific*

*This information will be noted on the certificate of analysis that ships with this product.

Product Information

Catalog Number: FM0036-APC

Clone: PK136

Isotype: Mouse IgG2a, κ

Conjugation: APC

Excitation Source: Red 627-640 nm

Excitation Max: 651 nm **Emission Max:** 660 nm

Recommended Isotype Control(s): FlowMAb APC mouse IgG2a isotype control, unknown specificity **Immunogen:** Mouse spleen and bone marrow cells enriched for NK1+ cells

Reported Applications: Flow cytometry **Formulation:** PBS, pH 7.0

Contains 0.09% Sodium Azide

Production: Purified from cell culture supernatant in an animal-free facility

Purification: Protein A RRID: AB 1107737

Description

The PK136 monoclonal antibody reacts with mouse NK1.1, also known as CD161b/CD161c, KLRB1, NKR-P1A, and Ly-55. NK1.1 is a type II integral membrane glycoprotein with a C-type lectin domain and is encoded by the KIrb1c/NKR-P1C gene. NK1.1 plays roles in NK cell activation and differentiation, IFN-γ production, and cytotoxic granule release and is thought to be involved in the generation of Th2 cells. NK1.1 is predominantly expressed as a disulfide-linked homodimer on NK cells; however, it is also expressed on NK-T cells, a rare population of T lymphocytes. The NK-1.1 surface antigen (CD161c) is encoded by the KIrb1c/NKR-P1C gene that is expressed on NK cells of C57BL, FVB/N, and NZB, but not A, AKR, BALB/c, CBA/J, C3H, C57BR, C58, DBA/1, DBA/2, NOD, SJL, and 129 mouse strains. The CD161b antigen, on the other hand, is encoded by the KIrb1b/NKR-P1B gene that is expressed only by Swiss NIH and SJL mouse strains and not by the C57BL/6 mouse strain. Accordingly, the PK136 antibody works for CD161b/CD161c-expressing strains only. This allophycocyanin (APC)-conjugated version of the PK136 antibody is useful for flow cytometry and immunohistochemistry (frozen) applications.

Storage

Store at the stock concentration at 4°C and protected from prolonged exposure to light . **Do not freeze.**

Protocol Information

It is recommended that the reagent be carefully titrated for optimal performance in the assay of interest.
