

# Technical Data Sheet

## ReadyTag anti-HA

**Attention:** Use of this product constitutes an agreement to Bio X Cell's Terms and Conditions which are included with this product in print and can also be found at <https://bioxcell.com/terms-and-conditions>.

### Lot Specific Information

**Lot Number:** Lot Specific\*  
**Volume:** Lot Specific\*  
**Concentration:** Lot Specific\* (generally 4 to 11 mg/ml) \*  
**Total Protein:** Lot Specific\*

\*This information will be noted on the certificate of analysis that ships with this product.

### Product Information

**Catalog Number:** RT0268  
**Clone:** 12CA5  
**Isotype:** Mouse IgG2b  
**Recommended Dilution Buffer:** InVivoPure pH 7.0 Dilution Buffer  
**Immunogen:** Influenza virus hemagglutinin protein (AA 98-106)  
**Reported Applications:** ELISA  
Western blot  
Immunoprecipitation  
Immunofluorescence  
**Formulation:** PBS, pH 7.0  
Contains no stabilizers or preservatives  
**Endotoxin:** <2EU/mg (<0.002EU/μg)  
Determined by LAL gel clotting assay  
**Purity:** >95%  
Determined by SDS-PAGE  
**Sterility:** 0.2 μm filtration  
**Production:** Purified from cell culture supernatant in an animal-free facility  
**Purification:** Protein G  
**RRID:** [AB\\_2687791](https://europepmc.org/abstract/proc/ptb/t/AB_2687791)  
**Molecular Weight:** 150 kDa

### Description

The 12CA5 monoclonal antibody recognizes the 9-amino acid sequence YPYDVPDYA, derived from influenza virus hemagglutinin (HA). HA is commonly added to proteins of interest using recombinant DNA technology. The HA tag can then be used for detection or purification of the tagged protein.

### Storage

Store at the stock concentration at 4°C. **Do not freeze.**

It is not uncommon for a floccule or precipitate to appear during storage. The floccule is typically buffer salts precipitating out of solution or a small bit of protein aggregation. For information on how to remove floccules or precipitates see our FAQ's at <https://bioxcell.com/faqs>.

### Protocol Information

Since applications vary, each investigator should use the application references as a guide to help estimate the appropriate dose or concentration. The dose or concentration can be further optimized experimentally in a dose response or titration experiment.
