

Technical Data Sheet

InVivoSIM anti-human CEACAM5 (Labetuzumab Biosimilar)

Attention: Use of this product constitutes an agreement to Bio X Cell's Terms and Conditions which are included with this product in print and can also be found at <https://bioxcell.com/terms-and-conditions>.

Lot Specific Information

Lot Number: Lot Specific*
Volume: Lot Specific*
Concentration: Lot Specific* (generally 4 to 11 mg/ml) *
Total Protein: Lot Specific*

*This information will be noted on the certificate of analysis that ships with this product.

Product Information

Catalog Number: SIM0039
Clone: Labetuzumab
Isotype: Human IgG1, κ
Recommended Isotype Control(s): RecombiMAb human IgG1 isotype control, anti-hen egg lysozyme
Recommended Dilution Buffer: InVivoPure pH 7.0 Dilution Buffer
Mutations: K214R
Immunogen: Human CEACAM5
Reported Applications: *in vivo* functional assays
in vitro functional assays
ELISA
Western blot
Flow cytometry
Formulation: PBS, pH 7.0
Contains no stabilizers or preservatives
Endotoxin: <0.5EU/mg (<0.0005EU/ μ g)
Determined by LAL gel clotting assay
Purity: >95%
Determined by SDS-PAGE
Sterility: 0.2 μ m filtration
Production: Purified from cell culture supernatant in an animal-free facility
Aggregation: <5%
Determined by SEC
RRID:
Molecular Weight: 150 kDa

Murine Pathogen Test Results

Mouse Norovirus: Negative, Mouse Parvovirus: Negative, Mouse Minute Virus: Negative, Mouse Hepatitis Virus: Negative, Reovirus Screen: Negative, Lymphocytic Choriomeningitis virus: Negative, Lactate Dehydrogenase-Elevating Virus: Negative, Mouse Rotavirus: Negative, Theiler's Murine Encephalomyelitis: Negative, Ectromelia/Mousepox Virus: Negative, Hantavirus: Negative, Polyoma Virus: Negative, Mouse Adenovirus: Negative, Sendai Virus: Negative, Mycoplasma Pulmonis: Negative, Pneumonia Virus of Mice: Negative, Mouse Cytomegalovirus: Negative, K Virus: Negative

Description

This non-therapeutic biosimilar antibody uses the same variable regions as the therapeutic antibody, Labetuzumab, making it ideal for research use. This Labetuzumab biosimilar is a humanized anti-carcinoembryonic antigen antibody, and it reacts with carcinoembryonic antigen-related cell adhesion molecule 5 (i.e., CEACAM5), which is also called CEA or CD66e.

During fetal or early embryonic stages, CEACAM5 is expressed in the digestive system, and it is found over-expressed in cancerous tissues. CEACAM5 acts as a cell adhesion molecule (CAM), and it inhibits anoikis, a type of apoptosis that is induced upon cell detachment from the ECM. Through this mechanism, CEACAM5 facilitates tumorigenesis and metastasis. CEACAM5 expression is often found upregulated in a variety of human epithelial malignancies, such as breast cancer, colon cancer, lung cancer, neuro-endocrine prostate cancer (NEPC), and pancreatic cancers. In cancer immunotherapy research, CEACAM5-targeted vaccines, bispecific T cell engagers (BiTEs), CAR T cell therapies, and antibody-drug conjugates are routinely tested in various experimental models. In vitro and in vivo studies involving the use of the humanized anti-carcinoembryonic antigen antibody Labetuzumab have shown the antibody to inhibit the cell proliferation and growth of CEACAM5+ tumors.

Storage

Store at the stock concentration at 4°C. **Do not freeze.**

It is not uncommon for a floccule or precipitate to appear during storage. The floccule is typically buffer salts precipitating out of solution or a small bit of protein aggregation. For information on how to remove floccules or precipitates see our FAQ's at <https://bioxcell.com/faqs>.

Protocol Information

Since applications vary, each investigator should use the application references as a guide to help estimate the appropriate dose or concentration. The dose or concentration can be further optimized experimentally in a dose response or titration experiment.
