

# Technical Data Sheet

## InVivoSIM anti-human CD3 x BCMA (Teclistamab Biosimilar)

**Attention:** Use of this product constitutes an agreement to Bio X Cell's Terms and Conditions which are included with this product in print and can also be found at <https://bioxcell.com/terms-and-conditions>.

### Lot Specific Information

**Lot Number:** Lot Specific\*  
**Volume:** Lot Specific\*  
**Concentration:** Lot Specific\* (generally 4 to 11 mg/ml) \*  
**Total Protein:** Lot Specific\*

\*This information will be noted on the certificate of analysis that ships with this product.

### Product Information

<b>Catalog Number:</b>	<b>SIM0067</b>
<b>Clone:</b>	<b>Teclistamab</b>
<b>Isotype:</b>	Human IgG4, $\lambda$
<b>Recommended Dilution Buffer:</b>	InVivoPure pH 7.0 Dilution Buffer
<b>Mutations:</b>	S228P/F234A/L235A
<b>Immunogen:</b>	Human BCMA-Fc recombinant protein
<b>Reported Applications:</b>	Functional assays Flow cytometry ELISA Immunohistochemistry
<b>Formulation:</b>	PBS, pH 7.0 Contains no stabilizers or preservatives
<b>Endotoxin:</b>	<0.5EU/mg (<0.0005EU/ $\mu$ g) Determined by LAL gel clotting assay
<b>Purity:</b>	>95% Determined by SDS-PAGE
<b>Sterility:</b>	0.2 $\mu$ m filtration
<b>Production:</b>	Purified from cell culture supernatant in an animal-free facility
<b>Purification:</b>	Protein A
<b>Aggregation:</b>	<5% Determined by SEC
<b>RRID:</b>	
<b>Molecular Weight:</b>	150 kDa

### Murine Pathogen Test Results

Mouse Norovirus: Negative, Mouse Parvovirus: Negative, Mouse Minute Virus: Negative, Mouse Hepatitis Virus: Negative, Reovirus Screen: Negative, Lymphocytic Choriomeningitis virus: Negative, Lactate Dehydrogenase-Elevating Virus: Negative, Mouse Rotavirus: Negative, Theiler's Murine Encephalomyelitis: Negative, Ectromelia/Mousepox Virus: Negative, Hantavirus: Negative, Polyoma Virus: Negative, Mouse Adenovirus: Negative, Sendai Virus: Negative, Mycoplasma Pulmonis: Negative, Pneumonia Virus of Mice: Negative, Mouse Cytomegalovirus: Negative, K Virus: Negative

### Description

This non-therapeutic biosimilar antibody utilizes the same variable regions as the therapeutic antibody Teclistamab, making it ideal for research use. Teclistamab is a humanized IgG4 bispecific monoclonal antibody that targets both B-cell maturation antigen (BCMA) on malignant plasma cells and CD3 $\epsilon$  on T cells. BCMA is predominantly expressed on plasma cells and plays a crucial role in their survival and proliferation. By simultaneously binding to BCMA and CD3, Teclistamab redirects T

cells to recognize and eliminate BCMA-expressing multiple myeloma cells through T-cell activation and subsequent cytotoxicity. The Fc region of Teclistamab contains S228P/L234A/L235A mutations to minimize its immunological effector functions. This biosimilar antibody is a valuable tool for studying T-cell engagement, bispecific antibody mechanisms, and BCMA-targeted therapies.

## Storage

Store at the stock concentration at 4°C . **Do not freeze.**

It is not uncommon for a floccule or precipitate to appear during storage. The floccule is typically buffer salts precipitating out of solution or a small bit of protein aggregation. For information on how to remove floccules or precipitates see our FAQ's at <https://bioxcell.com/faqs>.

## Protocol Information

Since applications vary, each investigator should use the application references as a guide to help estimate the appropriate dose or concentration. The dose or concentration can be further optimized experimentally in a dose response or titration experiment.
