

# Technical Data Sheet

## InVivoSIM anti-human CD3 x GPRC5D (Talquetamab Biosimilar)

**Attention:** Use of this product constitutes an agreement to Bio X Cell's Terms and Conditions which are included with this product in print and can also be found at <https://bioxcell.com/terms-and-conditions>.

### Lot Specific Information

**Lot Number:** Lot Specific\*  
**Volume:** Lot Specific\*  
**Concentration:** Lot Specific\* (generally 4 to 11 mg/ml) \*  
**Total Protein:** Lot Specific\*

\*This information will be noted on the certificate of analysis that ships with this product.

### Product Information

<b>Catalog Number:</b>	<b>SIM0069</b>
<b>Clone:</b>	<b>Talquetamab</b>
<b>Isotype:</b>	Human IgG4, $\kappa$
<b>Recommended Dilution Buffer:</b>	InVivoPure pH 7.0 Dilution Buffer
<b>Mutations:</b>	S228P/F234A/L235A
<b>Reported Applications:</b>	Functional assays Flow cytometry ELISA Immunohistochemistry
<b>Formulation:</b>	PBS, pH 7.0 Contains no stabilizers or preservatives
<b>Endotoxin:</b>	<0.5EU/mg (<0.0005EU/ $\mu$ g) Determined by LAL gel clotting assay
<b>Purity:</b>	>95% Determined by SDS-PAGE
<b>Sterility:</b>	0.2 $\mu$ m filtration
<b>Production:</b>	Purified from cell culture supernatant in an animal-free facility
<b>Purification:</b>	Protein A
<b>Aggregation:</b>	<5% Determined by SEC
<b>RRID:</b>	
<b>Molecular Weight:</b>	150 kDa

### Murine Pathogen Test Results

Mouse Norovirus: Negative, Mouse Parvovirus: Negative, Mouse Minute Virus: Negative, Mouse Hepatitis Virus: Negative, Reovirus Screen: Negative, Lymphocytic Choriomeningitis virus: Negative, Lactate Dehydrogenase-Elevating Virus: Negative, Mouse Rotavirus: Negative, Theiler's Murine Encephalomyelitis: Negative, Ectromelia/Mousepox Virus: Negative, Hantavirus: Negative, Polyoma Virus: Negative, Mouse Adenovirus: Negative, Sendai Virus: Negative, Mycoplasma Pulmonis: Negative, Pneumonia Virus of Mice: Negative, Mouse Cytomegalovirus: Negative, K Virus: Negative

### Description

This non-therapeutic bispecific biosimilar antibody uses the same variable regions as the therapeutic bispecific Talquetamab, making it ideal for research use. Talquetamab is a humanized IgG4 bispecific T-cell engager (BiTE) that targets GPRC5D, a receptor highly expressed on multiple myeloma cells, and CD3 $\epsilon$  on T cells. It redirects T cells to form a cytotoxic synapse with GPRC5D-positive tumor cells, triggering perforin- and granzyme-mediated apoptosis of malignant plasma cells.

## Storage

Store at the stock concentration at 4°C . **Do not freeze.**

It is not uncommon for a floccule or precipitate to appear during storage. The floccule is typically buffer salts precipitating out of solution or a small bit of protein aggregation. For information on how to remove floccules or precipitates see our FAQ's at <https://bioxcell.com/faqs>.

## Protocol Information

Since applications vary, each investigator should use the application references as a guide to help estimate the appropriate dose or concentration. The dose or concentration can be further optimized experimentally in a dose response or titration experiment.
